

Catoosa County Public Schools Digital Learning Initiative

What is *Let's get CONNECTed* ?

To meet the needs of today's students, and the expectations of stakeholders based on our 2013 strategic plan survey, Catoosa County Public Schools committed to the *Let's get CONNECTed!* Technology initiative. Through this initiative, every student in every Catoosa County school will have access to a Chromebook or an iPad, creating a 1:1 digital learning environment.

Our journey to a 1:1 digital learning environment.

Catoosa County Public Schools has been working toward a 1:1 for several years. The district's investment in technology has focused primarily on updating classroom computers and computer labs, along with strengthening the system's network. The district has worked steadily over the past two years to increase the number of wireless access points in classrooms, along with providing more bandwidth for all of our schools since technology has transitioned to a more mobile environment.

In the 2013--2014 school year, the district piloted and then adopted a virtual learning high school program called the Catoosa Online Academy. The COA was recognized nationally in the spring of 2014 for its success and innovativeness. This successful venture demonstrated that our students are capable of learning at a high level using technology resources to enhance traditional classroom teaching methods.

In the 2014--2015 school year, an instructional technology cohort committee was formed, and the district piloted digital classroom products for use in the 1:1 digital environment. The district and individual schools have been purchasing Chromebooks to use in classrooms for instruction and state testing. The use of Chromebooks has grown each year. The system is continuing to sponsor an instructional fair for all teachers which includes many sessions dedicated to the use of classroom instructional technology.

In March 2016, the community overwhelmingly voted to pass the ESPLOST V referendum which included the *Let's Get CONNECTed* initiative. With ESPLOST pennies to fund the initiative, the district can successfully achieve the goal of a 1:1 digital learning environment for our students. Over the next year, the system will begin to place the devices in every school for every student. We are looking forward to this outstanding opportunity

Chromebooks

Student Devices.

Students in 3rd through 12th grade will be using Chromebooks. Our students in 9th through 12th grade will be allowed to take their Chromebooks home. Our primary grades students (PK-2nd) will be using iPads at school.

What is a Chromebook?

A Chromebook is a laptop type device that runs Google's Chrome operating system. The Chromebook is an internet ready device that allows students to access classroom resources on the web without the costs or issues typically associated with traditional laptops. The device has an outstanding battery life and only needs a few seconds to power on and be ready for student use.

What advantages does the Chromebook offer?

The Chromebook's quick start up time and long battery life allows teachers to maximize classroom instructional time with technology use. Additionally the Chromebook allows teachers to personalize instruction within the blended learning environment. Students can begin to have some control over their learning pace, time and space.

Will students be able to take Chromebooks home?

Our students in the 9th-12th grade will have a Chromebook assigned to them so that they can use it at school or at home. The district has begun the process of developing options for internet connectivity for those students who do not have internet access at home.

What happens if the student has a Chromebook that is not charged?

Students will have the opportunity to charge their Chromebooks at a designated location in the building, it is however the student's responsibility at the high school level to bring the device charged each day to school.

What happens if a student breaks or loses a Chromebook?

Students will be allowed to use a temporary replacement Chromebook at school until the one issued to them is repaired or replaced. Students may be assessed repair charges if the damage to the Chromebook is determined to be willful or intentional. The General Use and Care of the Device section help to define the guidelines for damages.

Will there be extra devices available for checkout when needed?

Each school will additional Chromebooks available for temporary checkout. The temporary checkout Chromebooks will stay at school.

How will students at the high school level be associated with the Chromebook they receive?

Each Chromebook will be assigned a CCPS inventory tag, and this number will be entered into a district owned inventory software. The inventory number assigned to the student's Chromebook will appear in the Student Information System until the Chromebook is returned at the end of the school year. Students will also be given a unique login by the system.

Who owns the Chromebooks?

The Chromebooks are the property of Catoosa County Public Schools at all times.

How will students login to the Chromebooks?

Students will have a Catoosa County issued Google account and this will be their primary login username and password. The Google Apps for Education and Classroom site is setup to be used with only CCPS issued login information.

What devices can be connected to a Chromebook?

USB storage devices, mice, earbuds, headphones, microphones, external monitors and projectors can all be connected to Chromebooks.

Can students at the high school level keep the Chromebooks over the summer?

Students will not keep the Chromebooks over the summer. The system will review the devices for annual maintenance. The devices issued to students who leave the district (graduation, transfer, etc.) will be reformatted and re-issued to other students on an as-needed basis.

How long should Chromebooks last?

Chromebooks have very few moving parts and generate very little heat. Since all applications run through the Chrome browser or other Google App and software cannot be downloaded to the Chromebook, there is little concern that a virus will infect the software or hardware. The system expects the devices to last four years, perhaps five if they are well maintained.

Can parents use the Chromebooks?

The Chromebooks are not intended for personal use by either the student or parent. Each student will be assigned a unique CCPS Google login which is to be used with the Chromebook. When a student is logged into the Chromebook, parents can review student work through the Google Suite of Applications or other internet applications as assigned by teachers. Students and parents can review current grades through the Parent Portal within Infinite Campus which is available via the web or phone app.

Can a student opt out of having to use a system issued Chromebook?

The Chromebooks used by students are expected to become an important part students' education in Catoosa County Schools. If a high school student does not want to take a system issued Chromebook home there will be an available option for the student to check out a Chromebook which will remain at school. The Chromebook will however be assigned to students individually while they are enrolled in a CCPS school. Students opting to use the check-out daily option are expected to follow the General Use and Care of the Device guidelines.

Can a student work on assignments from different locations or devices?

The Google Classroom and Google Apps for Education will be available on any Chrome Browser or Google Mobile Apps available device provided the student uses their unique Catoosa County login credentials. The content will be the same on the Chromebook as it is on a PC desktop computer or laptop/mobile device, as long as the student is logged into the Catoosa County Google Classroom or Google Apps for Education domain.

How can students submit work or assignments?

The Google Classroom and Google Apps for Education have built in features for assignment submission or "sharing" features between teachers and even students. Students can create documents, spreadsheets, drawings, photos, presentations and other work which can be submitted or emailed to teachers or other students if group collaboration is part of the assignment. As the system transitions to digital textbooks, the Chromebooks will be used to access those resources.

What if a student is out of school for an extended period of time?

With high school students each having their own device and all students having a software suite that allows for classroom work to be accessed on any internet connected device, the students will have more options to access and complete class assignments when they are not at school.

Will teachers know how to include technology in their lessons?

CCPS teachers have been integrating technology in their lessons for several years. The district recently completed its second instructional fair which focused heavily on technology for the classroom, and the district is represented at the state technology conference. As technology has evolved so has training throughout the district. Currently training is introduced to the district cohort instructional technology team which is followed by members of the cohort team training at their individual schools.

Access, Infrastructure, Troubleshooting and Safety

Will the school system filter sites the Chromebook can access at home?

Student safety is our top priority; therefore, we reserve the right to provide filtered access and content along with parent supervision. Catoosa County Schools may expand their web filtering capabilities to include the GoGuardian software. GoGuardian is a content filter that works in conjunction with a student's CCPS Google login to block categories consistent with CIPA (Children's Internet Protection Act). It is impossible for any web filter to be 100% accurate when categorizing content on the Internet so CCPS encourages parents to regularly monitor their children's use of the Internet while at home whether the student is using a system owned Chromebook or a personal device. At the present time, the School District provides appropriate-age students with access to a Chromebook or similar device, and a School District login account particularized to each student. Parents are encouraged to obtain the password for their student's account and to monitor their student's usage. The District reserves the right (through its electronic filtering, personnel, or through third party entities/software) to conduct a limited monitoring of all activity, communications, or searches made on these devices and/or through these accounts. However, students and parents acknowledge that the District does not have the manpower, the financial resources nor the capacity to provide a detailed monitoring of all content on the Chromebook/device or on the account, or on any other electronic or written materials. No guarantees are being made that monitoring will be activated, that monitoring will be activated at any particular time, or that even if monitoring is activated, that notification will be attempted or will be made to any student or parent or school personnel of any harmful or potentially harmful occurrence, event, threat, danger or activity, whether past, present, or future.

Can the Chromebooks connect to home Wi-Fi network?

Yes, if the student has an available wireless network. Student browsing however will be filtered on the Chrome browser because they are logging in with their CCPS Google Account which GoGuardian monitors.

Will the school have the right see what students do at home on the Chromebooks?

Yes, the Chromebooks belong to Catoosa County Schools and may be searched at any time by school/district personnel. Google offers the Vault capability which allows the district to review archived communications as well as search saved documents located in student accounts.

Do schools have the infrastructure needed to support the 1:1 initiative?

The school system continues to upgrade the network capacity for all schools along with upgrading the overall bandwidth at each school. The wireless network has been upgraded at each elementary and middle school. The high schools are scheduled for an upgrade during the 2016--2017 school year.

How will a password be reset if a student forgets or needs theirs changed?

The usernames and passwords are set up by the system and in the event a password needs to be changed the staff at the school will work with the technology department in order change it.

Who will assist with computer problems during the year?

High school students will deliver their devices to a school designated area and check out a loaner, for school use only, if needed. The current process for assistance for middle and elementary schools will remain in place. The staff at the elementary and middle schools complete a help desk request and a technician assigned to the school will review and repair or initiate a warranty repair process.

Catoosa County Schools Internet Acceptable Use Policy

Electronic Resources: Policy – Instruction

The Catoosa County Schools Board of Education recognizes that an effective public education system develops students who are globally aware, civically engaged, and capable of managing their lives and careers. The board also believes that students need to be proficient users of information, media, and technology to succeed in a digital world.

Therefore, the Catoosa County Public School district will use electronic resources as a powerful and compelling means for students to learn core subjects and applied skills in relevant and rigorous ways. It is the district's goal to provide students with rich and ample opportunities to use technology for important purposes in schools just as individuals in workplaces and other real-life settings. The district's technology initiative will enable educators and students to communicate, learn, share, collaborate and create, to think and solve problems, to manage their work, and to take ownership of their lives.

The Board directs the Superintendent or designee to create strong electronic educational systems that support innovative teaching and learning, to provide appropriate staff development opportunities and to develop procedures to support this policy.

Legal Reference

Illegal activities are strictly prohibited, according to Georgia Code 16-9-93 as it pertains to computer theft, computer trespass, and computer invasion of privacy, computer forgery, and computer password disclosure. Violation of Georgia Code 16-11-37.1 as it pertains to dissemination of information through a computer or computer network includes any picture, photograph, drawing, or verbal description designed to encourage, solicit or promote terrorist acts and/or threats.

Electronic Resources: Procedure

These procedures are written to support the Electronic Resources Policy of the board of Education and to promote positive and effective digital citizenship among students and staff. Digital citizenship represents more than technology literacy: successful technologically fluent digital citizens live safely and civilly in an increasingly digital world. They recognize that information posted on the Internet is public and permanent and can have a long-term impact on an individual's life and career. Expectations for student and staff behavior online are no different than face-to-face interactions.

Network

The district network includes wired and wireless computers and peripheral equipment, files and storage, e-mail and Internet content (blogs, web sites, web mail, groups, wikis, etc.). The district reserves the right to prioritize the use of, and access to, the network.

All use of the network must support education and research and be consistent with the mission of the district.

Acceptable network use by district students and staff includes:

- Creation of files, projects, videos, web pages and podcasts using network resources in support of educational research;
- Participation in blogs, wikis, bulletin boards, and groups and the creation of content for podcasts, e-mail and web pages that support educational research;
- With parental permission, the online publication of original educational material, curriculum related materials and student work. Sources outside the classroom or school must be cited appropriately;
- Staff use of the network for incidental personal use in accordance with all district policies and guidelines;

Unacceptable network use by district students and staff includes but is not limited to:

- Personal gain, commercial solicitation and compensation of any kind;
- Liability or cost incurred by the district;
- Downloading, installation and use of games, audio files video files or other applications (including shareware or freeware) without permission or approval from Technology Department Staff.
- Support or opposition for ballot measures, candidates and any other political activity;

- Hacking, cracking, vandalizing, the introduction of viruses, worms, Trojan horses, time bombs and changes to hardware, software, and monitoring tools;
- Unauthorized access to district school computers, networks, or information systems;
- Cyberbullying, hate mail, defamation, harassment of any kind, discriminatory jokes and remarks;
- Information posted, sent or stored online that could endanger others (e.g., bomb construction, drug manufacture);
- Accessing, uploading, downloading, storage and distribution of obscene, pornographic or sexually explicit material; and
- Attaching unauthorized equipment to the district network. Any such equipment will be confiscated.
- Employees are not permitted to use their own computing devices to access the Internet via personal Wi-Fi accounts or by any manner other than connecting through the secure wireless connection provided by the school system. CCPS reserves the right to inspect any personal device brought onto CCPS property.

The district will not be responsible for any damages suffered by any user, including but not limited to, loss of data resulting from delays, non-deliveries, mis-deliveries or service interruptions caused by its own negligence or any other errors or omissions. The district will not be responsible for unauthorized financial obligations resulting from the use of, or access to, the district's computer network or the Internet.

Internet Safety: Personal Information and Inappropriate Content

Students and staff should not reveal personal information, including a home address and phone number, on websites, blogs, podcasts, videos, wikis, e-mail or as content on any other electronic medium. Students and staff should not reveal personal information about another individual on any electronic medium. No student pictures or names can be published on any class, school or district web site unless the appropriate permission has been verified according to district policy. If students encounter dangerous or inappropriate information or messages, they should notify the appropriate school authority.

It shall be the responsibility of all members of the Catoosa County Schools staff to attempt to supervise usage of the online computer network and access to the Internet in accordance with this policy and the Children's Internet Protection Act. As required by the Children's Internet Protection Act, Catoosa County Schools will educate minors about appropriate online behavior, including interacting with other individuals on social networking websites and in chat rooms and cyberbullying awareness and response.

Filtering and Monitoring

Filtering software is used to block or filter access to visual depictions that are obscene, pornographic or harmful to minors in accordance with the Children's Internet Protection Act (CIPA). Other objectionable material could be filtered. The determination of what constitutes "other objectionable" material is a local decision.

- Filtering software is not 100% effective. While filters make it more difficult for objectionable material to be received or accessed; filters are not a solution in themselves. Every user must take responsibility for his or her use of the network and Internet and avoid objectionable sites;
- Any attempts to defeat or bypass the district's Internet filter or conceal Internet activity are prohibited: proxies, https, special ports, modifications to district browser settings and any other techniques designed to evade filtering or enable the publication of inappropriate content;
- E-mail inconsistent with the educational and research mission of the district will be considered SPAM and blocked from entering district e-mail boxes;
- The district will attempt to provide appropriate adult supervision of Internet use. The first line of defense in controlling access by minors to inappropriate material on the Internet is deliberate and consistent monitoring of student access to district computers;
- Staff members who supervise students, control electronic equipment or have occasion to observe student use of said equipment online, must make a reasonable effort to monitor the use of this equipment to assure that student use conforms to the mission and goals of the district; and
- Staff must make a reasonable effort to become familiar with the Internet and to monitor, instruct and assist effectively.

Copyright

Downloading, copying, duplicating and distributing software, music, sound files, movies, images or other copyrighted materials without the specific written permission of the copyright owner is generally prohibited. However, the duplication and distribution of materials for educational purposes are permitted when such duplication and distribution fall within the Fair Use Doctrine of the United States Copyright Law (Title 17, USC) and content is cited appropriately.

Network Security and Privacy

Passwords are the first level of security for a user account. System logins and accounts are to be used only by the authorized owner of the account, for authorized district purposes. Students and staff are responsible for all activity on their account and must not share their account password. The existence of a password does not create an expectation of privacy.

These procedures are designed to safeguard network user accounts:

- Change passwords according to district policy;
- Do not use another user's account;
- Do not insert passwords into e-mail or other communications;
- If you write down your account password, keep it out of sight;
- Do not store passwords in a file without encryption;

- Do not use the “remember password” feature of Internet browsers; and
- Lock the screen, or log off, if leaving the computer.
- Never allow a student to use a computer unless they are logged on under their own account or are using a generic student account (elementary).

Student Data is Confidential

District staff must maintain the confidentiality of student data in accordance with the Family Education Rights and Privacy Act (FERPA).

No Expectation of Privacy

The district provides the network system, e-mail and Internet access as a tool for education and research in support of the district’s mission. The district reserves the right to monitor, inspect, copy, review and store, without prior notice information about the content and usage of:

- The network;
- User files and disk space utilization;
- User applications and bandwidth utilization;
- User document files, folders and electronic communications;
- E-mail;
- Internet access; and
- Any and all information transmitted or received in connection with network and e-mail use.
- No student or staff user should have any expectation of privacy when using the district's network. As noted previously, electronic mail is subject at all times to monitoring, and the release of specific information is subject to applicable state and federal laws and School System rules, policies, and procedures on confidentiality

Disciplinary Action

All users of the district’s electronic resources are required to comply with the district’s policy and procedures with or without a signed agreement. Violation of any of the conditions of use explained in the Electronic Resources Policy or in these procedures could be cause for disciplinary action, including but not limited to suspension or expulsion from school and suspension or revocation of network and computer access privileges.

Privileges --Additionally, access to the Internet and electronic resources is a privilege, not a right. Therefore, users violating the Catoosa County Board of Education’s acceptable use policy shall be subject to revocation of these privileges and potential disciplinary action.
